Igor Z. Palubski

(641) 814 6480 ● ipalubsk@uci.edu ● https://github.com/ipalubsk

Education

- **University of California, Irvine** ... **Irvine, CA**
  Ph.D in Physics, ... *Expected Graduation: November 2022*
- **Iowa State University** ... **Ames, IA**
  B.S in Physics ... *Awarded 2017*

Programming Languages: Python ● C ● Matlab ● Fortran ● Java
Familiar with: Linux Systems ● Git
Natural Languages: English (fluent) ● Polish (fluent)
Related Coursework: Two graduate courses in Machine Learning
Honors: Sagan Exoplanet Summer Workshop Travel Grant 2019 ● Gene Ruby Scholarship - May 2015, 2016 ● Dean's List - 2014, 2016

Software Experience

- **University of California, Irvine - Graduate Student Researcher** ... **Irvine, CA**
  Astrophysics Theory ... *November 2020 - Present*
  Develop and analyze cosmological, hydrodynamical simulations for Dark Matter studies.

  ● Implemented new physics modules in an existing hydrodynamical physics code in C, including a velocity-dependent Self Interacting Dark Matter Model (SIDM) and evolving baryon gravitational potential;
  ● Wrote a Python script for the analysis of hydrodynamical simulation output: evolving density and velocity profiles.

  Irvine, CA
  Shields Center for Exoplanet Climate and Interdisciplinary Education ... *August 2018 - November 2020*
  Extrasolar planet climate studies using a hierarchy of numerical models of varying complexity.

  ● Explored the effects of orbital dynamics on the habitability of Extrasolar planets by implementing a parallelized 1-Dimensional Energy Balance Model in Matlab for large parameter space scans on supercomputers. Results show that a significant habitable zone is present even at high orbital eccentricities.
  ● Wrote a fortran script for creating climatic initial conditions for synchronously rotating planets of desired spatial resolution for the GCM.

Communication Skills

- **Talks and Poster Presentations**
  - Habitability and Water Loss Limits on Eccentric Planets Orbiting Main-Sequence Stars, ExSoCal 2020 and American Astronomical Society/Division for Planetary Sciences Meeting October 2020 (**Talks**)
  - Temporal Habitability and Water Loss Limits on Eccentric Planets, Exoclimes V, August 2019 and Sagan Exoplanet Summer Workshop, July 2019. (**Posters**)
  - Eccentricity Thresholds for Planetary Deglaciation at Varying Obliquity, KITP Conference: "Planet-Star Connections in the Era of TESS and Gaia", May 2019 and American Astronomical Society, AAS Meeting 233, id.247.24, January 2019 (**Posters**)
- **Other**
  - 5 years of experience teaching undergradtue Physics courses, 2 years of mentoring experience of graduate and undergraduate group members.
